- Infrastructure Design and Implementation

Website from Static to dynamic:

When users come to your website, within moments they'll decide if it's the place they're going to find the information they're seeking or complete the action they came there to complete. If your website falls short, so will your bottom line. As your business' home base on the web, your website design isn't something to quickly throw together and then forget about.

A QUICK LESSON ON RESPONSIVE WEB DESIGN

Responsive web design allows a website to adapt to and provide an optimal experience on any device it's being accessed from.

This means that your website should look and function flawlessly for a user on a desktop computer, laptop, tablet, or smartphone. Because of its increasing importance, every single website developed by Mainstreethost utilizes responsive web design, modifying perfectly to each device a website's users are accessing it from.

Ensuring that your website caters to its users' needs is vital, and the device it's being accessed on is very telling of the wants, needs, and specifications of a user. A user accessing your website on a laptop will likely behave differently than a user on a mobile device, so it's important to be cognizant of this.

Custom Software Development:

We have a ton of expertise and take great pleasure in providing custom web and mobile application development to address your business' needs. We embrace Agile development using Scrum, which means we believe in a lean, iterative development approach. We'll adjust our programming services to your changing needs as each project progresses, always keeping your success as the ultimate goal.

Call center:

The Afghanistan is the world's number one destination for call center outsourcing. Our company START TELECOM Solutions is a rapidly growing call center serves big and small companies worldwide.

Stark telecom can provide :

Customer call center

Order Taking

Help desk tech support

Reservations and bookings

CCTV :

We are a team of seasoned executives, technical sales representatives, customer service and engineering staff with expertise in security and surveillance. We employ the latest, innovative technologies to meet your surveillance and security needs.

We offers **security cameras** that encompass a vast variety of features that will take care of any security system need. Our cameras includes technologies that allow you to view your **security camera** picture 24/7.

One of the feature these **security cameras** have is that they are weatherproof which gives them the ability to be used indoors or outdoors. Also our tough, vandal proof dome **security cameras** provide strong anti-vandal protection. You also have the ability to chose between standard and high resolution **security cameras**.

Communications Cabling

STARK TELECOM Communications specializes in low voltage systems of any nature. We can manage and provide communications connectivity for all of your system-wide needs for wiring and controlling the brains and infrastructure of your facility. STARK TELECOM Communications provides a solution that simplifies projects that change, expand, upgrade, relocate or maintain your facility.

Network Cabling Design and Engineering

STARK TELECOM Communications can assess your needs and develop a complete network cabling design for LANS, WANS, and both inter-building and multiple building campus environments. Future needs, current codes and international specifications are considered in every design. We work with your information technology personnel and coordinate your project with all interested parties. Projects ranging from small additions, upgrades to brand new facilities and office relocations all have benefited from Ivey Communications experience and expertise.

Hardware sales & Services

We offer servers, computers, computer accessories and services by sourcing from local market and from international market as well. Our team of experts is ready to serve you when you are worried due to lack of confidence in “commitment of service”. You are hereby requested to call us for any kind of requirement of computers, computer parts and services whatever and whenever you need.

STARK TELECOM services also offer & Supply, Delivery & Installation of:

- Data Centre , Structure Cabling Systems
- CISCO Switch, Firewall, Routers, Wireless Equipment's
- PC, Server & Storage
- Server & Switch Equipment maintenance

High-Speed Internet Service Providers:

STARK TELECOM Internet from Comcast delivers the fastest wireless, microwave, VSAT Internet service.

Choose STARK TELECOM from Comcast to enjoy download and upload speeds that are much faster than DSL , Sims, point to point from the phone company.

Wireless Internet

Enjoy a better online experience with faster surfing, streaming, and downloading.

Whether your neighbors are across the street, across the field, across the county or a small business, with STARK TELECOM Fixed Wireless Internet you can get fast Internet speeds you can download, surf, and stream with confidence.

Microwave Internet Service

Microwave radio transmission has been used for wireless data transmission since before the terms wireless broadband or WiFi came into common usage. It was primarily used by businesses to connect separate office buildings or locations. Transmission was limited by slower data speeds, line-of-sight connections and bandwidth issues. The development of WiMAX -- Worldwide Interoperability for Microwave Access -- technology has improved upon these shortcomings.

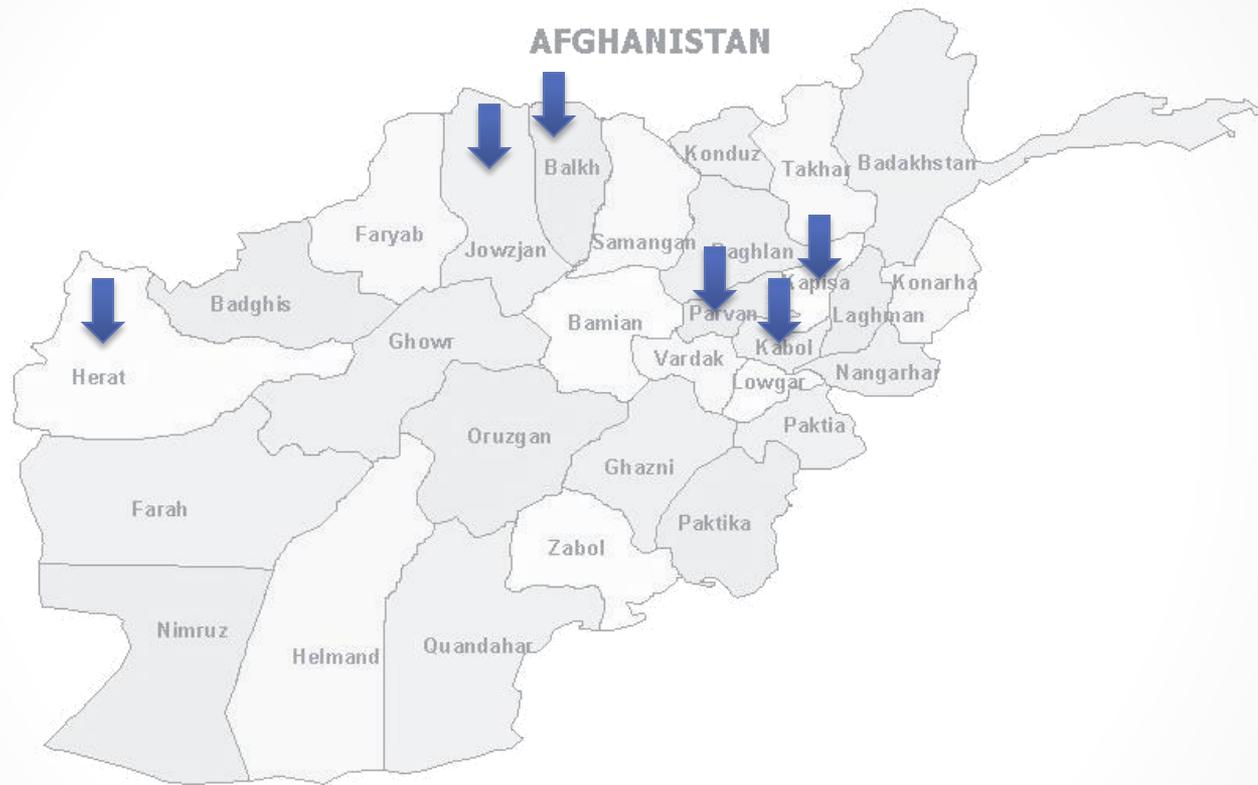

VSAT, Satellite internet connection STARK TELECOM

We know that there are places that fiber hasn't reached and won't for quite some time. It's why Liquid VSAT offers you business-speed internet via satellite anywhere in Afghanistan. If you're a bank we make it possible to open fully-linked branches in remote towns.

If you're a mine we'll enable you to operate seamlessly miles from anywhere.

If you're in the tourism industry we'll help your beautifully isolated Safari lodge offer customers internet connections they'd expect when paying for a luxury getaway. And these are just a few of the ways our award-winning satellite service can help you.
